ORIGINALE 04 – the Porsche Classic catalogue

Dear reader,

When I was in primary school my best friend's mother had a mint green 964 Targa. Seeing her stop at the school crossing on her way to work is a snapshot of the 1990s that I'll always remember. The styling and the colour really struck me, and the car was so much smaller than the SUVs and Minivans that all the other parents drove, and it stood out because of that. Marsha was a self-made Hollywood businesswoman with an edgy sense of style, and her 964 was the pièce de résistance for me. She drove that car because she loved it.

Today when I open the door of my white 1991 C2, it's a journey back to 4th grade and a peek into what it was like to head to the office for my friend's mother: simplicity and purity mixed with just the right blend of technology and performance that was a long way ahead of its time. That car is completely immersive and emotional, and

with the benefit of 25 years' worth of hindsight, it's clear the designers took a big step with the 964 – they really turned a corner from the iconic and long-lasting G-model. And it looks so good. I work hard to preserve the smell of the original leather, to make sure the air conditioning blows cold, and I love that while it's got excellent ABS, I don't lose that traditional pedal feel of earlier generations of 911.

Don't roll your eyes when I admit I was born in the 1980s. For me, I think of my cars as time machines, and driving cars of different vintages gives me some perspective of what automotive life was like in a certain period. The closest I can come to living in 1966 is jumping in my Irish Green three-gauge 912. When I drive to the market in the 912, the pitted, original windscreen is my moving picture frame. When I drive my C2, it's like I've hit the rewind button on

life, and I'm living the fantasy I had when I was in the 4th grade.

As cars become more automated, more intuitive and often, take less effort to drive, I value the pure experiences of classic cars even more. With a number of classic Porsche cars in my collection, knowing that the genuine parts will remain available to me makes me confident that my family will be able to enjoy these cars for generations to come.

Porsche Classic Motoroil 10W-50

Part no. **PCG04321000** (1 litre)
Part no. **PCG04321020** (5 litres)

Porsche Classic developed the Classic Motoroil especially for the water-cooled four-cylinder and eight-cylinder engines in Porsche transaxle vehicles.

The Porsche Classic Motoroil is a high-performance synthetic oil which offers superb lubricating and protective properties, with high temperature resistance and very good shear stability in all operating conditions.

The engine oil impresses with an excellent cold start viscosity, featuring exemplary flow behaviour through all engine components when starting from cold. Engineered in Weissach. Made in Germany.

Please only use original Porsche spare parts for your vehicle. You can obtain these parts from authorised Porsche dealers. Your Porsche Partner is familiar with the verified range of parts and will be happy to advise you. Porsche will not accept any liability for damage caused by the use of spare parts or accessories not authorised by Porsche.

The safety of the vehicle may be affected, even if a supplier of accessories or parts has obtained a general operating licence. The huge variety of products available on the accessories market means that Porsche is not able to verify such parts. Please note that the guarantee for your vehicle may also be affected if you use parts which are not authorised by Porsche. Porsche reserves the right to alter the design, equipment and scope of delivery without prior notice. Colour tones and materials may differ from those illustrated. Errors excepted.

Due to country-specific legislation and requirements, product contents may differ from those described and individual items may not be available for all models in certain countries.
