# 2019

Detlev von Platen has been the Member of the Executive Board for Sales and Marketing at Dr. Ing. h.c. F. Porsche AG since 2015. Born in the French city of Orléans in 1964, he studied business administration at university. In 1997, he was appointed Director of the Porsche brand at the French importer Sonauto SA. He joined Porsche Cars North America as President and CEO in 2008.

# ORIGINALE 05 – the Porsche Classic catalogue

Dear reader,

More than 70 per cent of all Porsche vehicles ever built are still on the road today. This is no coincidence; rather, there are many reasons why this is the case. One of the most important of these reasons is people like you and me. People who possess the dedication, passion and expertise to cherish, maintain and, of course, drive their Porsche – over years and decades. I am just like any other Porsche fan: My garage is home to a 911 Carrera 3.2 Cabriolet built in 1988 and a Porsche 928 GTS built in 1994. I love to drive both of my cars regularly. As different as these vehicles may be, in their unique way they both convey the sporty and timeless feeling that can only be achieved in a Porsche.

Porsche Classic ensures that this feeling can continue long into the future: Offering individual genuine parts or even a complete restoration, this corporate division provides

a comprehensive service tailored to the sports cars of previous Porsche series. Customer service has always been an important part of our tradition and will remain so in the years ahead. The demand for classic Porsche cars has never been as strong as it is now, and we are committed to creating the right conditions for maintaining these unique vehicles.

Our top priority is to offer an immaculate level of service and guarantee our supply of genuine parts. To ensure we can deliver on our promise to care for these classic vehicles, we have spent the last five years building our international network, which now includes around 70 Porsche Classic Partner. With the help of our partners, our product range is regularly expanded to include new genuine parts that naturally fulfil all of our requirements regarding technology, safety and quality.

We even recently built a brand-new classic car using the genuine parts in our range: A 911 turbo with an air-cooled engine, known as the "Project Gold – 911 Turbo Classic Series". It was manufactured in the Porsche Classic workshop in Stuttgart 20 years after the end of series production. "Project Gold" showcases the comprehensive skill of Porsche Classic in a fascinating format and it clearly demonstrates our strategic orientation. Although we are starting a new chapter in our sports car history with the Porsche Taycan, the story of how the company evolved is no less significant. On the contrary: The golden yellow 911 Turbo Classic Series demonstrates how incredibly passionate we are about the tradition of our brand.

Some of the components in the "Project Gold" vehicle are featured in this issue of "ORIGINALE", in addition to

lots of other interesting news and information. I hope you have as much fun reading this issue as you do driving your classic car.

Yours,  
Detlev von Platen
