# 1950 02

## February 1950

Ferry Porsche (lower right) with his father, Ferdinand Porsche (at the drawing board) in the former Porsche design office in Stuttgart-Zuffenhausen. Front left, engine designer Leopold Jäntsche with a 1100-cc engine for the first 356.

Because the factory (now Werk 1) was still occupied by Americans, the design office had been accommodated in a makeshift hut right next to the factory. It wasn't until the end of 1955 that Porsche KG could go back into the factory.

# ORIGINALE – The Porsche Classic Catalog

Dear Reader,

A Porsche has always been different from any other car. In the consistency of its concept, its design and its production. This standard still applies to every Porsche today. And it applied to the very first car to bear the Porsche name – the Porsche 356 No. 1. “I would have built it exactly the same way, right down to the last screw,” said Ferdinand Porsche when he saw his son Ferry’s design. Thereby acknowledging the consistency of the first Porsche, right down to the very last detail. And from racing we know that it is often the smallest, apparently most insignificant parts that can determine whether a race is won or lost.

This understanding of the significance of each individual part and their perfect interaction is what makes a Porsche. A standard that applies to each individual part that Porsche Classic offers and which applies

all the more to the work performed by the Porsche Classic Partners throughout the world who have our seal of approval. So you can be sure that your classic Porsche is in the best hands.

However, a lot of our parts involve more than the engineering skill that goes into their development and the care taken in their production. Behind every part there are the people who conceived and designed it. Who rigorously put it through its paces and made it better. Every part has a story that contributes to the overall value of your classic Porsche. Did you know why there were grey cast iron reinforcements fitted behind the bumpers of the early 911 models? And why we no longer do that? Do you know that you can improve the drive of your classic 993 with our new edition shock absorbers? Or how you can tell the difference between a Porsche

Crest from 1994 and one from the sixties? And are you sure your Porsche has the right one?

The consistency that Ferry Porsche applied right down to the smallest detail is also the driving force behind the sixty or more people at Porsche Classic when it comes to keeping original Porsche as original as possible. Which is why this catalog, giving you a glimpse behind the scenes at Porsche Classic, is called “ORIGINALE”. Discover facts and stories about parts, types and techniques that you didn’t know before. We present more than 30 pages of new features from the Porsche Classic parts range, for you to keep your classic Porsche in the very best condition.

Enjoy your original!

The Porsche Classic Team.

### Tappet

Part no. **61610520100**

The **tappet** controls the valves on type 1300 and 1600 engines. Eight of these **tappets** are needed for an engine overhaul.

**356** (1950–1959)

---

### 27 mm venturi

Part no. **90110098303**

This **venturi** with a diameter of 27 mm is suitable for Weber carburetors.

**914/6** (1970–1972)

**911 F** (1965–1971)

---

### Oil cooler with hose fitting

Part no. **91110704102**

The reissued **oil cooler with hose fitting**, now returning outstanding figures, is back in store at your Porsche Classic Partner or Porsche Center. It sets itself apart from comparable reproductions on the aftermarket by being considerably lighter and better performing. Matches the original in terms of performance, weight and appearance. The **oil cooler with hose fitting** screws directly onto the crankcase and keeps the engine oil cool.

**911 F** (1972–1973)

**911 G** (1974–1989)

---

### Air filter

Part no. **99611013104**

---

### Air mass flow sensor

Part no. **99660612300**

**986** (1997–1999)

**996** (1998–1999)

---

### Air supply pipe, left

Part no. **546 06063**

### Air supply pipe, right

Part no. **546 06064**

Manufactured by the original Porsche supplier, the **air supply pipe** right and left is now available from Porsche Classic once again. It carries warm air into the intake manifold of the carburettor. The air supply pipe shown here is for the right-hand side.

**356** (1950–1965)

**912** (1965–1969)

---

### Oil splash tube

Part no. **90110536201**

Original and 'Made in Germany': the aluminum **oil splash tube** in the camshaft housing is designed to lubricate the camshaft and rocker arms. Since soiling and sludging is unavoidable over many years of operation, and could even find a way into the engine compartment, Porsche Classic recommends that the **oil splash tube** should be renewed each time the engine is overhauled.

**914/6** (1970–1972)

**911 G** (1974–1979)

---

### Radiator coil

Part no. **91110704700**

After a long absence, the **radiator coil** is monopolizing the market. Forming part of the substantial oil cooling circuit, it is fitted in the front right wheel arch. Connection points are sealed with plastic caps to prevent the ingress of dirt.

**911 F** (1970–1973)

---

### Intake hose

Part no. **91110723300**

The perfect connection between the oil tank and oil cooler.

**911 G** (1974–1989)

### Intake hose

Part no. **93010723302**

Provides the perfect connection between the oil tank and oil cooler.

**911 G** (1978–1989)

### V-belt pulley half

Part no. **93010620902**

The **V-belt pulley half** for driving the alternator is a precision part that has been manufactured to the original specifications. Reproducing the appearance of the part fitted in the car of the time, it makes the engine compartment glisten with its former, original sheen.

**911 G** (1974–1989)

---

### Microswitch

Part no. **91160601303**

For perfect control, and guaranteed 'Made in Germany': the **microswitch** on the throttle valve for controlling the engine management system.

**911 G** (1984–1989)

### Maintenance set

Part no. **92810093110**

This **maintenance set** is for the periodic care of engine types M28.50 and M28.49. It consists of eight spark plugs (part no. 99917018990), one oil filter (part no. 92810720105), one sealing ring (part no. 90012301130), one air filter insert (part no. 92811018503) and one air filter cartridge (part no. 92811344500).

**928** (1992–1995; M28.49/50)

---

### Vacuum unit

Part no. **477905243**

Produced by the original supplier to the latest standards: the vacuum unit for perfect operation of the distributor. In combination with the distributor, the **vacuum unit** ensures that the ignition point is always correctly timed, whatever the operating conditions.

**924** (1980–1988)

---

### Gear wheel for the camshaft drive

Part no. **94410512507**

The gear wheel on the crankshaft. For the 944 from model years 1987 to 1991 with engine types M44.40 and M44.41, and for the 968 from model years 1992 to 1995 with engine types M44.43 and M44.44. An absolute precision part, manufactured to the original specifications and with cutting-edge production techniques. A new edition. Exclusive to Porsche Classic.

**944** (1987–1991)

**968** (1992–1995)

---

## Fuel / exhaust system

**Sports exhaust system**  
Part no. **00004420021**

The **exhaust system in sports design** for the Porsche 996 from model years 1998 to 2005. Not available for the Porsche GT3 or for Australia, Japan and Taiwan country variants.

**996** (1998–2005)

**Fuel tank, 62-liter**  
Part no. **91120190402**

The **62-liter fuel tank**: produced with optimized original tooling and in accordance with the original manufacturing techniques.

**911 F** (1969–1973)

**Fuel tank, plastic, 85-liter**  
Part no. **91120101013**

The **85-liter plastic fuel tank** for the 911 Carrera RS 2.7 and the 911 from model years 1969 to 1973 is back. Advantages over a steel tank: lighter and longer-lasting. In addition, it is 'Made in Germany' by the former series production supplier.

**911 F** (1969–1973)

**Exhaust silencer**  
Part no. **91111102505**

Classic Porsche sound: the relaunched **exhaust silencer** impressively reproduces the unmistakable, typical 911 sound of the 1970s. Now it's back and looks just like the original: typical matt grey with heat-resistant coating. Manufactured to the highest quality standards by a supplier with decades of proven experience, the **exhaust silencer** also bears – of course – the Porsche trademark.

**911 F** (1965–1973)

**Fuel return line**  
Part no. **91135606407**

'Made in Germany' and available exclusively from Porsche Classic: the Y-manifold for the **fuel return line**. Fitted between the fuel pump and fuel filter, it returns fuel to the fuel tank. For mechanical injection.

## Important note on replacing shock absorbers for the Porsche 911, Type 993 (1994-1998)

As the shock absorbers originally fitted as standard to the chassis of the models listed below are no longer available from the supplier, defective shock absorbers will, in the event of a repair, be exchanged for shock absorbers of non-identical design.

Shock absorbers must always be exchanged in axle sets or – depending on the vehicle equipment specification – in complete sets (front and rear axle).

For further information (technical installation instructions) or any additional attachment parts that might be required, please consult your Porsche Classic Partner or authorized Porsche dealer.

Vehicle models:

911 Carrera / 911 Carrera S  
911 Carrera 4 / 911 Carrera 4S  
911 Targa / 911 Turbo

## Couldn't find the right part?

At [www.porsche.com/classic](http://www.porsche.com/classic), you will regularly find new information on product highlights, reissues and accessories – simply click on your model.

If the original part that you want is not available from your Porsche Classic Partner or authorized Porsche dealer, please let us know using the feedback form on our website. You will find this form in any of the subcategories under 'Genuine Parts'.

Information on availability and fitment compatibility and approval in different countries can be obtained from your authorized Porsche dealer.

Porsche strongly recommends the use of genuine Porsche parts and accessories for your vehicle. These are available from your authorized Porsche dealer, who will be pleased to advise you. Porsche cannot accept liability for damage caused by the use of replacement parts or accessories which are not approved by Porsche.

Even if a potential supplier has been granted general type approval for accessories or parts, the use of such parts may affect the safety of the vehicle. Porsche is not able to check non-original parts because of the large number of products which are offered on the aftermarket. Please note that your vehicle warranty can also be affected if parts are used which are not formally approved by Porsche. Porsche reserves the right to alter specifications and other product information without notice. Colors and materials may differ from those illustrated. Errors and omissions excepted.

The availability of equipment and options may vary from market to market due to local restrictions and regulations.
